The Game

By his avaricious uncle, Donald got the instruction to collect the famous golden eggs at five dangerous places. He will travel to each place via teleporter (which looks like a basket) and is only allowed to travel back if he got all golden eggs. Donald has to get one egg at a time and put it in the teleporter. Some bonus items can also be collected. Blocks blocking the way can be crushed with dynamit. Surely Donald has to pay attention to lots of dangers ...

The Places

The Amazonas: Starting in the jungle Donald travels through secret caves, above the ground, to Inka-statues and reaches an Inka-city. Deadly spiders, manutsnakes and dangerous thorns are to master. Get diamonds for bonus.

Transsylvania: Dracula's castle is real hard. Bats, ghosts and deadly spikes will frighten Donald. Fortunately, there are some holy crosses to collect. Magic mirrors transport Donald to other places.

African Mines: In this lost mines Donald has to look out for nails, moving spikes, underground sees and falling rocks. Diamond rings make Donald happy. Breaking bridges will disappear when walked over and secret passageways lead to hidden valuables.

The Himalayas: It's getting cold! Over dangerous mountain-peaks Donalds way leads into dark caverns. Snowstorms, dangerous crevasses and cold water await. Some sweet icecream also waits. Slippery icetracks disappear under Donalds feet and some hips of snow are not as solid as they look like.

The Moon: This is the most dangerous place! After wandering on the surface, Donald enters an alien spaceship. Moonmonsters, deadly eruptions and hot moonwater will kill him. There are lots of "living" floors, traps and secret passageways. The green cheese tastes great, even if it doesn't look so.
